

Bavière in Liège

The project comprises the construction of a property consisting of housing, student housing, a nursing home, a nursery and a gym in the iconic Bavière site in Liège. The construction is expected to take ten years.

The construction project has been divided into various phases with various scopes. The current planning schedule is based on a ten-year period of construction.

Our mission as QQS is to verify, check and ensure that the client's objectives in terms of budget, techniques, deadlines and quality are respected.

The project has already received the necessary planning permissions.
