

Place Rogier in Brussels

As part of the redesign of Place Rogier in Saint-Josse-ten-Noode, a new connection was created with the Pyramides Rogier exhibition rooms, the Rogier car park and the metro entrance.

We were also tasked with the front of the Rogier car park, as well as creating a light shaft in the square.

Immo-Pro was in charge of managing the entire construction project, from the construction, the many technical facilities to the financial aspects.
