

Sfar-Alseberg in Uccle (74 new dwellings)

We are working as a technical consultant for SFAR and its subsidiaries, which is building new social housing and amenities in the Brussels-Capital Region.

We are assisting the contracting authority throughout this project, which consists of designating and coordinating the various contractors, including engineering consultancies and companies, as well as following up the project in its entirety, their delivery and transmission to the operators.

The Sfar-Alseberg project will have 34 social housing units and 40 medium-sized homes as well as 57 underground parking spaces.

The project is currently in the study stage. The next step is the submission of an application for planning permission to the Brussels-Capital Region.
