

La Chemiserie Coster & Clément à Bruxelles

The project consists of a complete renovation development in order to have new housings.

67 new housings will be created, which will represent 6,000 sq.m. The other important modifications are : low annexes next to the existing building will be demolished, split of the existing plateaux, creation of new entries/lift, creation of surroundings : garden, parking places, bicycle places, transformation of some picture windows on the groundfloor and creation of others and skylights and facades and roof restoration.

The project is at the preparation of tendering process.

Our mission is to assist the client along the project in coordinating design offices.
